

Folding Chair

This project from my high school Manufacturing Technology class built on the importance of craftsmanship in executing this folding chair. The chair was constructed in two parts that separate for both compact storage as well as a comfortable, low-profile lounging chair.

Being that the chair is modular, people can utilize this in a variety of helpful ways. Sitting in the lounging position is the most intuitive, and if users wish, a quick triangle prop is perfect for drying towels after a day at the beach.

26in x 17in x 4.5in Folded
